

# Sinks and taps *collection*

## Choosing excellence

SMEG is a world leading Italian appliance manufacturer and, with over 70 years of expertise and a devout passion for excellence, has become an outstanding international reference in the design of products that truly express 'MADE IN ITALY' style.

Like all SMEG appliances the range of distinctively styled sinks are characterised by beautiful aesthetics, practical design, comfort of use and above all superior quality materials used.

## The perfect finishing touch

SMEG sinks are crafted to make an eye-catching statement in any contemporary kitchen space. The range is meticulously constructed using premium grade AISI304 Stainless steel and composite granite and as a result are sturdier, more durable and longer lasting than conventional sinks.

## Design & installation options

Choose from a selection of design oriented and functional solutions including single, double, or prep bowl options to suit your kitchen style and meet your exact requirements with a range of easy installation options.

Easy to install designs include inset sinks that simply drop-in to the counter-top and undermount sinks that are easily integrated into the worktop from below for a seamless look. All SMEG sinks come fully equipped with an installation kit to make fitting your new sink that much easier.

LRX902
